PROJECTS

- **Forklifts Occasion (Laravel Framework)**
Developed and implemented advanced filtering mechanisms that dynamically fetch and display database results based on user-selected criteria.
<https://forkliftoccasion.com/listings/>
- **Final Year Project – Legal Knowledge Graph**
Designed and developed a Legal Knowledge Graph application using Natural Language Processing (NLP), RDF, and SPARQL. The system interprets user queries and generates semantic graphs to extract meaningful insights. The platform is fully owned and maintained by me..
- **Full-Stack Web Development Projects (PHP, Bootstrap, jQuery, Ajax)**
Built and deployed multiple responsive and dynamic websites across various domains:
 - <https://cnsshoppingmart.com/>
 - <https://www.sstimepieces.co.uk>
 - <https://leofash.com/>
 - <http://dashingdots.io/>
- **AI-Powered Cover Letter Generator**
Created a Python-based academic project that auto-generates professional cover letters using AI models, streamlining the application process for users.
